

**Connecting The Electronics
Manufacturing Supply Chain**
**SPEEDING TIME TO
BETTER BUSINESS
RESULTS**

Connection, collaboration, and innovation are the principles that drive growth and prosperity across the global electronics manufacturing supply chain—this is the mantra that drives SEMI®.

SEMI **connects** people and companies worldwide to **collaborate** and **innovate**, speeding the time to better business results and forming the building blocks of the global digital economy.

Ajit Manocha
SEMI President & CEO

CONNECTION ENABLES THE COLLABORATION THAT DRIVES INNOVATION

IT ALL BEGINS WITH CONNECTION.

Every breakthrough starts with connection.

Brilliant minds envision incredible inventions, but bringing ideas to life takes a network of people, often across diverse industries and oceans. When brilliant minds **connect**, great things happen.

FROM CONNECTION COMES COLLABORATION.

“None of us is as strong as all of us.”

Connecting communities around common issues, interests, and challenges leads to understanding, solutions, and new ideas. **Collaboration** brings out the best of all of us. Through collaboration we turn ideas into action.

COLLABORATION SPEEDS INNOVATION.

We are smarter, faster, and more innovative together.

Innovation is the lifeblood of the electronics manufacturing supply chain. Innovation of new materials, manufacturing processes, and business models speed the development of new products, applications, and opportunities for electronics. It's the engine that drives exponential growth. The more we collaborate, the more we innovate, and the faster we move forward together.

SPEEDING THE TIME TO BETTER BUSINESS RESULTS

SEMI drives connection, collaboration, and innovation across the global electronics manufacturing supply chain.

SEMI is the global trade association that connects and represents the worldwide electronics manufacturing supply chain. Virtually since the birth of the integrated circuit, SEMI has connected our industry to collectively address technology and business challenges and advance electronics innovation and markets.

Through its programs, communities, initiatives, market research, and advocacy, **SEMI informs and coordinates its members and the industry, cultivates collaboration, drives action, and synchronizes innovation to speed business results.**

TECHNOLOGY COMMUNITIES

Working together, people, companies, and industries achieve more than they can alone. Industry segments have unique needs and face different issues that only people within the same community can advance effectively. **SEMI facilitates topic-specific communities, groups, and committees to address common issues,** drive collaboration, develop programs, and advocate on the behalf of SEMI members.

STANDARDS

The SEMI International Standards program brings the industry together to develop globally recognized standards and guidelines. SEMI Standards are instrumental in advancing industry growth, reducing costs of manufacturing, and accelerating technology innovation. **SEMI Standards speed products to the marketplace.**

More than 5,000 volunteers from more than 1,800 participating companies worldwide work tirelessly to create and sustain more than 970 standards and guidelines that fundamentally make the industry work together.

ADVOCACY

SEMI works around the world with governments, agencies, ministries, consortia, and other key decision makers to advance member interests on policies that enable trade, investment, and business growth. SEMI leverages collective action to champion member interests in environment, health and safety; intellectual property; export control; tax and trade; and workforce development.

Providing a unified voice of the industry, **SEMI has been influential in changing policy, shaping trade agreements, opening markets, passing key legislation, and initiating appropriate regulations that deliver industry growth and profitability.**

MARKET RESEARCH

The SEMI Industry Research and Statistics program collects and reports critical market data, including technology and business trends and regional market activity in multiple business segments. **The undisputed credibility of SEMI data helps our members, investors, and others understand market trends, identify new market opportunities, and better plan for industry business cycles.**

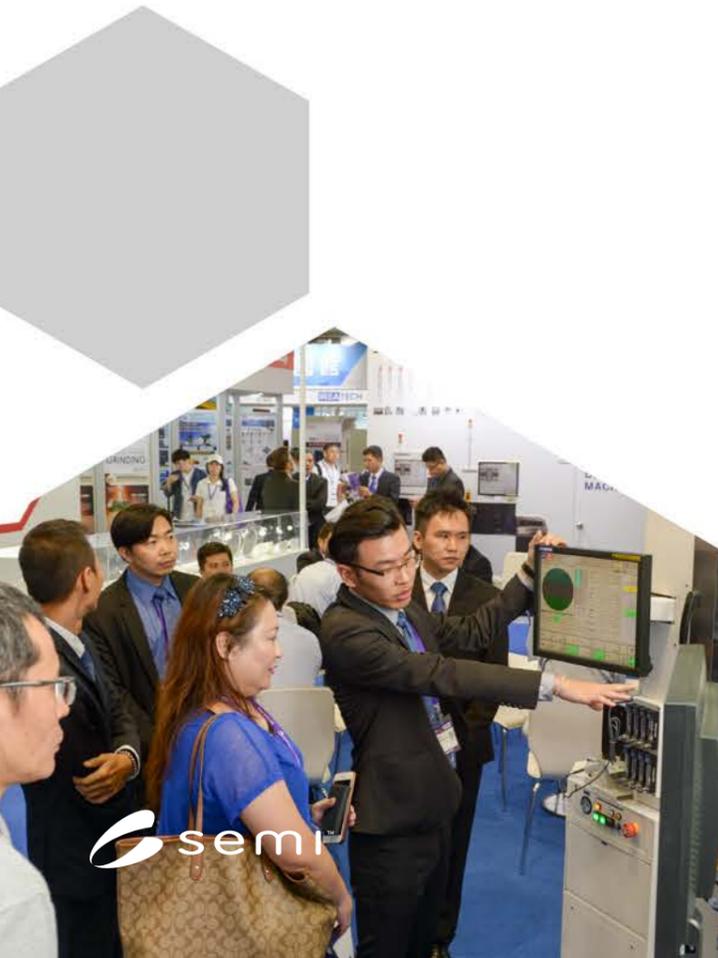

SEMI delivers fair and accurate data and business intelligence that is referenced by every major investment and market research organization. SEMI is the only not-for-profit organization that aggregates direct participation data from the industry, ensuring SEMI data is comprehensive, timely, and accurate.

EXHIBITIONS AND EVENTS

SEMI expositions and events—including SEMICON®—connect over 5,000 companies and 300,000 professionals around the world every year. **More than trade shows or conferences, SEMI events are platforms for connection and collaboration** where suppliers, customers, and partners across the electronics manufacturing supply chain build the relationships that grow their business.

“ **WITHOUT SEMI'S SUPPORT WE WOULD NEVER HAVE REALIZED OUR INTERNATIONAL EXPANSION PLANS IN SUCH A SHORT TIME PERIOD.** ”

DAS ENVIRONMENTAL

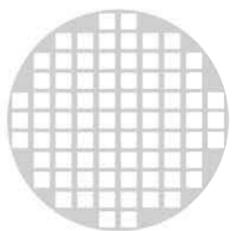

CONNECT, COLLABORATE, INNOVATE — IT ALL BEGINS WITH SEMI

SEMI opens the door for you to discover new opportunities, connect, and grow your business. As a SEMI member you have exclusive access to SEMI programs, initiatives, member-only content, and staff support that connect you to peers, experts, customers, industry leaders, and market opportunities worldwide.

- Access global markets, customers, and investors with the support of SEMI's regional offices and staff.
- Address challenges, identify solutions, and solve pre-competitive issues through participation in global communities and working groups.
- Gain early visibility to inflections in technology and regional markets through market data and research.
- Shape policies and regulations with collective action.

GLOBAL REACH

With SEMI offices and staff in every major electronics manufacturing region, no other electronics industry association has the global reach and depth to connect companies and people across the supply chain and around the world. Whether through participation in technology communities, as an exhibitor or attendee at our expositions and events, or by working with our network of global offices, SEMI connects industries, companies, and people; fosters collaboration that ignites innovation; and helps the industry grow and prosper together.

NETWORKING

Businesses are built on face-to-face connections. Companies and people need to meet each other to understand and solve the challenges that stand in the way of business success. **SEMI creates the platforms and the opportunities for people to meet, for communities to collaborate, and for business relationships to grow and prosper.**

INFLUENCE INDUSTRY AND TECHNOLOGY GROWTH

SEMI members have exclusive access to join technology communities, groups, and committees that support collaboration, advance manufacturing standards, spur technology innovation, and influence industry growth.

GROW YOUR BUSINESS AND BUILD YOUR BRAND

SEMI gives you and your company the opportunities to efficiently make connections, create partnerships, advance technology innovation, grow your business, and build your brand.

GAIN INSIGHTS WITH MEMBER-ONLY CONTENT

SEMI members have complimentary access to online, members-only business and technical content, including market research, webinars, presentations, and white papers, giving you more context and data to make sound business decisions.

SHAPE POLICIES THAT AFFECT YOUR BUSINESS

SEMI global advocacy efforts bring together individual companies to deliver a collective voice on issues that affect our industry. **SEMI's advocacy staff worldwide represent member interests on complex policy issues and ensure our members amplify their voice in shaping laws and policies around the world.**

SAVE TIME AND MONEY

SEMI member companies and their employees receive preferred pricing on exhibitor booth fees and services, conference registration, sponsorship, advertising, market data products, business products and services, and industry standards.

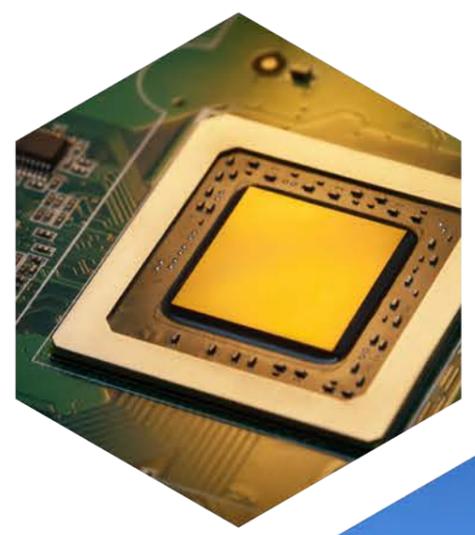

GLOBAL REACH LOCAL SERVICE
