

SEMI Electronic Materials Group (EMG) COVID-19 Response Survey

April 2nd 2020

CONNECT - COLLABORATE - INNOVATE - GROW - PROSPER

Have you heard of any interruptions at your fab customers or OSAT customers operations?

Are you permitting visitors (Customers, auditors, venders/field engineers) to your site?

How are you screening visitors (check all that apply)

Are you experiencing any interruptions at your own company's operations?

Are you experiencing any supply chain interruption to your operations?

Are you experiencing any workforce interruption to your operation?

Have you heard about the Department of Homeland Security “Essential Business” designation for semiconductor supply chain and chemical manufacturers?

Are you using SEMI's master letter to state governments to help you maintain your operations?

Have you modified your Business Continuity or Pandemic Response Plans based on this current pandemic?

Which areas have been impacted?

Have you had issues transitioning employees to work from home environment

Have you had issues transitioning employees to work from home environment

Yes (please describe): - Text

not 100% capable, particularly for non-exempt office workers

shortage of IT equipment

Network infrastructure strain

Minor issues with VPN access, conferencing software.

All functions that can work remote have done so. Also some engineers work on shifts at the fab (not typical arrangement)

Are you using 3rd party services to monitor impacts to your supply chain considering shelter in place orders in multiple geographies?

Are there any other questions or concerns, not included above, that you would like to see addressed at the EMG Open Forum call?

Are there any other questions or concerns, not included above, that you would like to see addressed at the EMG Open Forum call?

Yes (please describe): - Text

BKM for responding to a positive test in a cleanroom environment? Some facilities apply a 6-foot / 30-minute "contact" rule - is that a standard?

Best practices for management emergency coordination and employee communication

It would be good to share best practices for BCP type of actions for white collar workers(e.g. R&D, engineering, sales). These topics are not discussed much. How to ensure also customer interactions and development projects alive during these times.
