

# BOSCH DRESDEN – A DIGITAL PLANT

## SEMICON - SMART MANUFACTURING

Jens Krause  
Munich, 2021-11-17

Robert Bosch Semiconductor Manufacturing Dresden GmbH  
Robert-Bosch-Ring 1, 01109 Dresden

# Dresden – a digital AIoT plant

This continues Patrick Leinenbach's speech from the Executive Forum

Sensors but Eyes:  
no direct labor, full automation

Data driven fab release:

Faster production process  
stabilization through digitalization

Compensate small(er) Scale:  
Smart Data Management as differentiator  
against fabs with scale advantage

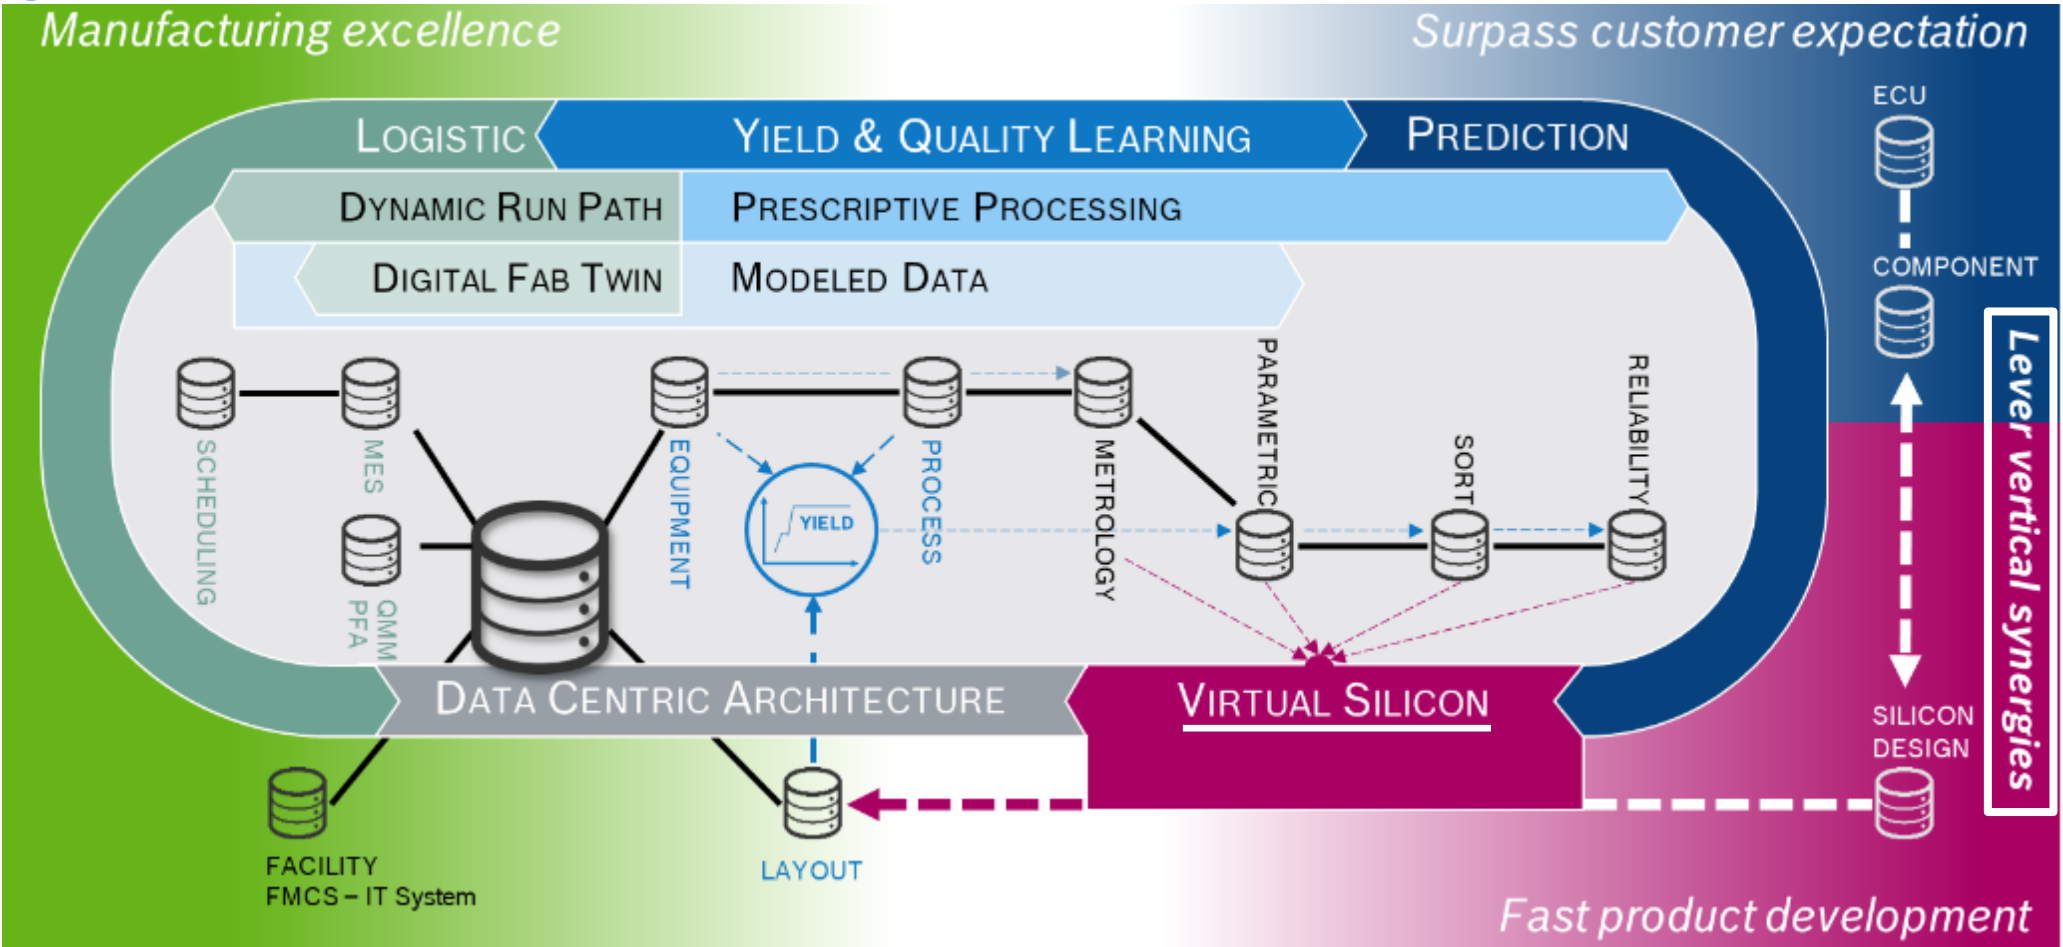

Digital ecosystem:

AIoT-centric process landscape,  
AIoT mindset of employees

# Bosch Dresden – A Digital Plant

## Digitalization as Enabler

# Bosch Dresden – A Digital Plant

## Digitalization Use Case: Digital Twin of Building (3D-BIM)

### State of the Art

1. As built model based on drawings, images and measurements on site
2. Conversion to Revit @ designer

Challenges: Errors in isometry creation due to incorrect measurements, human errors or poor accessibility

### New Standard

1. As built documentation with 3D laser scanning
2. Accuracy of 3 mm at 4m

Benefits: Better alignment to installations above and below clean room (sub Fab, plenum)

**Enables tool hookup with ~20% less cost and 30% time saving during installation\* and enables the complete digitalization even down to installation**

# Bosch Dresden – A Digital Plant

## Digitalization Use Case: Connected Infrastructure

Respective Utility and number of FMCS data sources

Effective Supplier Management based on data transparency.

# Bosch Dresden – A Digital Plant

## Digitalization Use Case: Remote Assist

Activities in Dresden

Use cases at other sites

- Major equipment suppliers located **outside EU**
- **Covid** related travel restrictions critical during fab commissioning
- Dresden piloted **a proof of concept** (*Safety, Security, Reliability*) for HoloLens application

Use case examples in whole value stream: remote commissioning of equipment, remote specialist support in unscheduled down events, conduction of remote training

# Bosch Dresden – A Digital Plant

## Digitalization Use Case: APC

Multivariate feedforward & feedback control to improve within wafer uniformity

FDC-based **waferline** feedforward & feedback control AI-enabled

R2R

FDC

Advanced/  
**FD-eCAP**,  
fleet matching

Lotbased feedforward & feedback control

Feedback R2R control only

Tool and subfab data collection

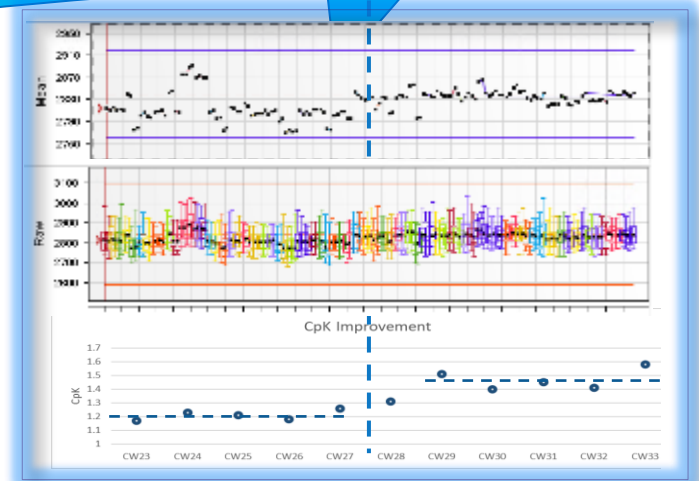

Univariate fault detection & classification

ML based multivariate fault detection & classification

1<sup>st</sup> example (CD\* measurement B0)

2021

2022

Adaptive Control across multiple connected equipments for improved capabilities.

# Bosch Dresden – A Digital Plant

## Skilled People Matter

Skills for the future of manufacturing

<p><b>1</b></p> <p><b>A</b></p> <p><b>Digital literacy</b> as a holistic skill to interact with, understand, enable, and even develop new digital manufacturing systems, technologies, applications, and tools</p>	<p><b>6</b></p> <p><b>Inter-cultural and -disciplinary, inclusive, and diversity-oriented mindset</b> to address new challenges arising from a more diverse manufacturing workforce</p>
<p><b>2</b></p> <p>Ability to use and design new <b>AI and data analytics</b> solutions while critically interpreting results</p>	<p><b>7</b></p> <p><b>Cybersecurity, privacy, and data/information mindfulness</b> to reflect the rapidly increasing digital footprint of the manufacturing value chain</p>
<p><b>3</b></p> <p><b>Creative problem solving</b> in times of abundant data and technological opportunities in smart manufacturing systems</p>	<p><b>8</b></p> <p>Ability to <b>handle increasing complexity</b> of multiple requirements and simultaneous tasks</p>
<p><b>4</b></p> <p>A strong <b>entrepreneurial mindset</b> including proactiveness and the ability to think outside the box</p>	<p><b>9</b></p> <p><b>Effective communication skills</b> with humans, IT, and AI systems through different platforms and technologies</p>
<p><b>5</b></p> <p>Ability to work <b>physically and psychologically safely and effectively</b> with new technologies</p>	<p><b>10</b></p> <p><b>Open-mindedness towards constant change, and transformation skills</b> that constantly question the status quo and initiate knowledge transfer from other domains</p>

... **at least 6** of the top ten skills **refer to digital skills!**

- "digital literacy" (1)
- "AI and data analytics" (2)
- "Creativity and abundance of data" (3)
- "cybersecurity and privacy" (7)
- "complexity management" (8)
- "Effective Communication with humans, IT and AI" (9)

Roles at Dresden Plant

	BIM Coordinator	SCRUM Master
	Data Engineer	Workflow Expert
	Expert Augmented Reality	Data Scientist
	Expert Visual Analytics	DevOps Engineer

## Data Driven & Human Centric

### Mission Statement

Wafer Fab RB300

[www.bosch-semiconductors.com](http://www.bosch-semiconductors.com)

... AIOT Smart Factory und Smart People

We work jointly with smart machines – together we are stronger.

**Bosch Semiconductors.**

We make the world safe, smart and accessible.

**Thank you for  
your attention**

**BOSCH**

Invented for life
